Still, if you do a bit of digging around, you'll find some interesting stories.

Arduino Ham Radio Repeater Controller

Auduino Repeater Controller Sketch:
Repeater Controller The Arduino controller uses a audio switch to control the receiver audio to the transmitter.

Read Online Arduino Ham Radio Repeater Controller

The switch can be as simple as a transistor to drive a relay and switch the audio. The receiver is usually around line level and the transmitter is usually around mic level.

the Speaker, Microphone, and PTT into 3 connectors it provides lots of flexibility for future radios and a trivial interface to connect things -- I could just as easily connect to a laptop soundcard or radio scanner as the "input".

**Arduino Repeater Controller -
millerm.org**

Read Online Arduino Ham Radio Repeater Controller

A basic repeater controller only needs to do a few things: Key up the transmit radio when the receive radio is receiving
Route the receive audio to the transmit radio
Send an ID at least once every ten minutes during a conversation.

Arduino Repeater Controller: Part 1
| David Andrzejewski

Read Online Arduino Ham Radio Repeater Controller

AllStar has all the essential capabilities of a repeater controller, IDing every 10 minutes and adjustable time-out timer. The time-out timer can be disabled with a command - useful when broadcasting ARNewline, which can be played automatically with a script, or hosting windbag nets. The scheduler is replaced with Unix Cron.
