engines such as the CCTA, CBFA and CCTA were phased in during model year 2008.

Those engines use an entirely different IMRC system which uses engine vacuum in conjunction with a solenoid so Basic Settings 142 must be completed at idle.

Never run Basic Settings with the IMRC motor linkage disconnected from the intake manifold.

I guess almost everyone knows there are 2 engines for the Golf V Gti with AXX being the "first" generation and BWA the newer one. There seem to be differences between the 2 engines, with the more "obvious" one being the change in static compression from 10.5 to 10.3 This may seem minor, but for a turbo engine, its quite a bit.

## **VWVortex.com - AXX Vs BWA 2.0 TFSI**

Note that the Audi specification for the 2.0 engines allows for a quart of oil to be used every 1,000 miles, and they will not consider this level of usage to be a fault. This is written in the manual if you look in the section on oil. However, many 2.0 TFSI owners routinely get only around 500-600 miles, which is definitely out
