In capitalism, owners control the factors of production and derive their income from it. Capitalism incentivizes people to maximize the amount of money they earn through competition. Competition is the driving force of innovation as individuals create ways to accomplish tasks more efficiently.

Capitalism: Definition, Characteristics, Pros, and Cons

Capitalism is a system of largely private ownership that is open to new ideas, new firms and new owners—in short, to new capital. Capitalism’s rationale to proponents and critics alike has long been recognized to be its dynamism, that is, its innovations and, more subtly, its selectiveness in the innovations it tries out.

Theory of Capitalism | The Center on Capitalism and Society

Shareholder capitalism failed because too few of us are shareholders. Owners have an incentive to protect their wealth rather than share it, explaining why we’ve ended up with a generation of policies that put capital ahead of labour. A lot of this is on us. Consider the grocery business.

It's going to take some government to save capitalism. The ...

At the same time, massive amounts of capital continue to float into the hands of a few. The price of innovating under capitalism is then both decreased innovation and decreased equality. The idea that this approach to innovation must be our best and only option is a delusion. As I see it, four ingredients are key to kindling innovation.

Innovation Under Socialism | Current Affairs

Robert Shiller: Capitalism and Financial Innovation

What is hidden beneath the path of aggregate profitability in Fig. 2.3 is the financialization of the patterns of accumulation. To fully account for the divergent patterns of finance over industrial profitability, Fig. 2.4 A and B shows yet another aspect: it was actually the rise of financial returns that increased aggregate profitability. As stagnation of industrial profit rates deepened ...
