If you are certified, or are seeking certification to the ISO 14001 standard, then you will have some awareness of the importance of measuring the effectiveness of your EMS performance, both as a guide to performance and as evidence that continual improvement is taking place. It therefore stands to reason that accurate measurement and the knowledge of exactly what needs to be measured are critical to your EMS performance itself.

ISO 14001 is the most popular of the 14000 family, and sets out the requirements for an effective environmental management system (EMS). In this way, it is in parallel to the ISO 9001 standard for defining the requirements of a quality management system (QMS); the difference is ISO 14001 focuses on principles of environmental management and sustainable development, instead of quality management.
