Networks can be wired or wireless with most networks being a mixture of both. Wired vs Wireless Networks. Early (pre 2008) networks were predominately wired. Today however most networks will use a mixture of wired and wireless network. Wired networks use Ethernet as the data link protocol. This is unlikely to change with the IOT, as IOT devices ...

**Basic Networking Concepts-Beginners Guide**  
Early computer networks used cable to connect computers together in a wired network. Most modern networks use wireless (wi-fi) as the main connection media and networks tend to be a mixture of wired and wireless. The diagram below shows a wired Ethernet network. To work each device must be connected to a Ethernet hub or switch.
