Making cylindrical square. - Practical Machinist

Hi there, I'm trying to make a cylinder with a very round physical surface, however, the default cylinder from the add menu has some pretty angular sides. Is there any way to increase the number of sides it has to make it smoother? Subdivision doesn't work, from the modifier menu, it starts to turn it into a sphere, and from edit mode > surface subdivision it just subdivides the faces already ...

How to make smoother cylinders? - Basics & Interface ...

Measure 1 inch and set another member. Alternate every other member spacing so there is a 3 inch gap then 1 inch gap (pics 4-8). This will net 12-15 spots per shelf for cylinder storage depending on cross member size. (2x2 vs 1.5x1.5). Repeat this step for each shelf layer needed to accommodate number of bottles stored.

Cylinder/bottle Rack : 5 Steps - Instructables

In a staved cylinder, the component parts are bevel-cut (shown in the Stave illustration) and joined edge-to-edge. So, things can become confusing when we start talking about the distance between the angles. On a stave that distance is the width, but on a segment, it's the length. For this article, we'll refer always to length.

Staves and Segments - WOOD Magazine

Create a cylinder and use the returned coordinates to plot multiple cylinders in different locations. Create a cylinder defined by the profile function $2 + \cos(t)$. $t = 0:\pi/10:2*\pi$; $r = 2 + \cos(t)$; $[X,Y,Z] = \text{cylinder}(r)$;
