I'm not much for manuals because most, as most musicians know, speak about the product as if you've already used it and have prior knowledge about it. The Reason 3 book, however, puts everything on an easy to understand level and the pictures do help a lot but would be more helpful if some were in color.

Let's have a look at 5 reasons why you should not rely on a bounty program as your primary guarantee of web application security. Reason 1. Not Everyone Knows about Your Program. Let's go back to the bank vault example. If you just put a poster on your bank door, only those who pass by will potentially notice it and even fewer will read it.
