1.9 CDTi - timing belt (Z19DTH and Z19DTJ engines) According to the manufacturer, the timing belt in this engine needs to be replaced every 100,000 miles or 10 years, whichever comes first. In my opinion, this is very optimistic. I recommend getting it replaced not later than 60k miles or every 5 years, whichever comes first.

### Z19dth Engine Timing - wp.nike-air-max.it

Thanks for the kind offer of the timing tools. TBH, if the tipex method has worked for others, then that is the route I'll take. A certain well-known auction site even has the full kit on offer inclusive of the tools, which is remarkable, but probably a bit of a luxury in this case.

### Vectra diesel Z19DTH timing belt change | Car Mechanics

Characteristics. The property that distinguishes the Multijet from previous generations of common rail diesel engines from FCA is the combustion of the fuel, which is split into multiple injections, thus allowing for a more complete, quieter combustion in the cylinder.Compared to the first-generation JTD engines (Unijet system) which only featured a smaller pilot and a larger main injection ...

### Fiat JTD engine - Wikipedia

However I just read that the z19 dth engine is the 16V dohc engine and the z19 dt is the sohc. Apparently there are gears inside doing the work instead of another pulley. It seems that this is maybe why my engine doesn't have the timing mark on the engine for the cam pulley as this is on the sohc engine only I think.
