Z Push Outlook Zarafa

Z-Push (presumably Z is for Zarafa) is a FOSS implementation of the Microsoft Exchange ActiveSync protocol which is used to synchronize email, personal contacts and other items between a central server and a mobile device. Note the difference between this protocol, and an earlier (technologically unrelated) protocol named Microsoft ActiveSync .

Z-push - Wikipedia

Z-Push | Open source push technology. Z-Push is an open-source application to synchronize ActiveSync compatible devices such as mobile phones, tablets and Outlook 2013 and above. With a

...

The compatibility list is being maintained in the Z-Push Wiki.. Latest News. Z-Push 2.5.2 final released; Z-Push 2.5.1 final release; Z-Push 2.5.0 final release

Compatibility | Z-Push

Our extension supports Outlook 2013 and newer versions (in 32 and 64 bit). The Kopano OL Extension (supported by the latest final release of Z-Push 2.3) marks a big step towards better integration of Outlook 2013 and 2016 with the Kopano World.

Kopano Outlook Extension available as final!

All the data that is accessible in Outlook needs to be synced to the local disk first. To reduce the time needed for synchronisation it is recommended to limit the sync timeframe either in Outlook or through Z-Push. Please make sure to have enough disk space to be able to sync the whole mailbox of a user.

Setting up the Kopano OL Extension - Kopano Wiki - Kopano ...

Z-Push introduction The Z-Push software allows users with PDAs and smartphones to synchronise their email, contacts, calendar items and tasks directly from a compatible server over LTE, UMTS, GPRS, WiFi or GSM data connections. An overview of devices that are natively supported by Z-Push can be found in the Z-Push Wiki.

6. Configuring Mobile Devices — KC User Manual 7.2.1 ...

Dear all, I recently installed Zarafa (Exchange replacement) on my Synology DS212+, using ZCP 7.1.8 and Z-Push v2.1.1-1. Syncing my i-devices, Outlook 2013 and a Windows Phone 8-device (Lumia 925) using the EAS protocol works fine, but one problem has come up: when I add a full-day appointment through any such device, it syncs just fine.

Sync problems between Zarafa & Z-Push (EAS) and Windows ...

Outlook versions 2013 and 2016 support ActiveSync, a protocol also used by many mobile clients, and by using the Z-push software on the server side, ActiveSync requests can be translated and such clients can effectively talk to a Kopano server as well. Kopano Core generally stores its data in a MySQL-compatible database.

Kopano (software) - Wikipedia

When the migration has worked you are all set to connect with Outlook to Zarafa - just create a new "Zarafa 6" account in Outlook (make sure it's the topmost account in the list if you have other accounts there - otherwise you won't see the content of your folders!!). Outlook sync is finished with that. Thunderbird + Lightning access
